

Smriti Irani to present Texprocil Export Awards in city on 14th December

By Our Staff Reporter

MUMBAI, DEC. 12—

The Cotton Textiles Export Promotion Council (TEXPROCIL) has organized its Annual Export Award Function on the eve of Thursday, 14th December 2017 in city.

Mrs. Smriti Irani, Union Textile Minister will present the awards to the textile exporters. Every year the Council recognizes the role played by exporters by giving out awards in different categories. This year the Council is distributing forty nine awards in thirty two different categories, including the coveted Platinum trophy for the highest global exports.

Leading textile companies like Welspun Global Brands Ltd, Vardhman Textiles Ltd., Alok Industries, Trident Ltd., Arvind Ltd, Loyal Textiles Mills Ltd., Lahoti Overseas, Premier Spg and Mills among others are some of the recipients of these awards.

Mr. Ujwal Lahoti, Chairman – TEXPROCIL stated that The Council is the international face of Indian textiles, a one point stop

for those who wish to source textiles from India. It has 3000 members who are engaged in the exports of cotton textiles including yarns, fabrics and home textiles including made ups.

For the period 2016-17, the Council members exported US\$ 10.7 billion worth of cotton textiles of which cotton yarns were US\$ 3.35 billion, cotton fabrics about

Post GST import of garments from Bangladesh jump by 56%: CITI

By Our Staff Reporter

MUMBAI, DEC. 12—

India's import of garments from Bangladesh has reached US\$ 87.4 mn. during July to November 2017, indicating a sharp increase of 56% from US\$ 55.92 mn during the same period last year according to the latest data released by Bangladesh Export Promotion Bureau, informed Mr. Sanjay Kumar Jain, Chairman, Confederation of Indian Textile Industry (CITI)

Table 1: India's imports of garments from Bangladesh

Commodity	July to Nov 2016	July to Nov 2017	Growth (%)
Knitted Apparel	17.9	30.1	69%
Woven Apparel	38.1	57.3	51%
Total	55.9	87.4	56%

Data Source: Bangladesh Export Promotion Bureau

During July to November 2017, Mr. Jain informed, India's imports of knitted apparel from Bangladesh increased by 69% while the imports of woven apparel increased by 51% corresponding to the same period last year.

CITI Chairman highlighted that the basic custom duty on import of garments from Bangladesh is exempted. In the Pre-GST Scenario, import of garment from Bangladesh was attracting cost of Rs. 77/pc (where MRP Rs. 999/pc) and Rs. 116/pc (where MRP is Rs. 1500/pc) in the shape of CVD + education cess thereon.

However, Post- GST scenario, there is no cost for import of garments from Bangladesh. Similarly, in the case of import of Garment from other countries, the cost has been substantially reduced by Rs.77/pc and Rs.116/pc where MRP is Rs.999/pc and Rs.1500/pc respectively, he said.

Hence, Indian garment industry will face stiff competition from imported garments especially from Bangladesh where production cost is already less than India, according to CITI Chairman.

Mr. Jain pointed out that there is an urgent need to impose safeguard measures such as Rules of Origin, Yarn Forward and Fabric Forward Rules on the countries like Bangladesh and Sri

Lanka that have FTAs with India to prevent cheaper fabrics produced from countries like China routed through these countries. Garment manufacturers in India have to pay duty on imported fabrics, while Bangladesh can import fabric from China duty free and convert them into garments and sell to

CAB estimates 377 lakh bales cotton crop in 2017-2018

By Our Staff Reporter

MUMBAI, DEC. 12—

The first meeting of Cotton Advisory Board (CAB) held today under the Chairmanship of Dr. Kavita Gupta, Textile Commissioner, has estimated cotton crop of 377 lakh bales for the Cotton Season 2017-2018 season.

Giving details of area and yield, Dr. Gupta informed that the area under cotton during the 2017-2018 cotton season has been estimated at 122.35 lakh hectares as against area of 108.45 lakh hectares during 2016-17 while the yield has been pegged lower at 522.83 kg. per hectare in 2017-18 cotton season as against yield of 540.80 kg. per hectare in 2016-17 season.

Textile Commissioner said that all cotton growing states have recorded an upward trend in production barring Maharashtra and

National Geographic adventurers choose Merino

From Tecoya NewsDesk

MUMBAI, DEC. 12—

One of National Geographic's Adventurers of the Year, Pete McBride has spent years travelling to the most remote parts of the world.

Speaking to National Geographic Traveller from Colorado's Elk Mountains, the intrepid traveller has his clothing choice put to the test as he often battles four seasons in one day.

"On an expedition, I have to think about weight, so what I put in my bag is critical. Clothes have to work together; they have to be tough, durable, light and stand extreme conditions," he tells National Geographic.

"If you're not well equipped, nature can feel like the enemy," he warns. McBride's story appears in the January 2018 print edition of the UK's National Geographic Traveller – as well as being published in the Chinese edition – as part of a partnership formed between The Woolmark Company and the iconic outdoors publication.

The feature also highlights the best commercially available Merino wool performance apparel, encouraging adventurous readers to tackle the great outdoors in Merino wool apparel from Helly Hansen, Ibex, Ortovox, Devold and Rab.

National Geographic is a globally trusted and iconic brand that believes in the power of storytelling to change the world. The partnership with The Woolmark Company further cements Merino wool's rightful place in the outdoor/activewear market and inspires a new generation of sports enthusiasts to choose wool.

"I like the idea of wearing natural fibres like Merino wool," continues McBride, who actually grew up raising sheep. "The weave of wool today is amazingly comfortable. It has an incredible breathability and it's durable." He even wore wool for the 71 days it took him to walk the entire length of the Grand Canyon in 2016, raising awareness about development projects which could damage the natural landmark.

It's Merino wool's naturally inherent properties such as odour resistance, moisture management, durability and comfort that make it so highly regarded by adventurers across the world and such an increasingly popular fibre for the outdoor apparel market.

The partnership between and National Geographic also contains a digital component on www.nationalgeographic.com with international reach, providing direct web links for commercially available product from international brands, offering readers a direct click-to-purchase option.

Brothers held for theft of branded clothes in Delhi

NEW DELHI, DEC. 12-(PTI)

The Delhi Police yesterday said they have arrested two brothers who stole branded garments worth Rs 1.5 lakh along with some cash from an upscale showroom in south Delhi's Kalkaji.

The accused brothers, one of whom previously worked in the showroom, had prepared a duplicate key to gain access into the store, they said.

On December 4, the duo got into the showroom and stole branded garments worth Rs 1.5 lakh besides Rs 14,000, said Additional Deputy Commissioner of Police (South) Vijayanta Arya.

Police have recovered the stolen garments as well as the cash from the accused — Ravi, 27, and Rahul, 23 she said.

The suspects were identified by the store owner in a CCTV grab as he worked at the storeroom and was fired for alleged misconduct, she said.

India to grow at 7.2 per cent in 2018; 7.4 per cent in 2019: UN

UNITED NATIONS, DEC. 12-(PTI)

India's growth rate is projected to accelerate to 7.2 per cent in 2018 and 7.4 per cent in 2019, the UN said, describing the outlook for the country as "largely positive".

Despite the slowdown observed in early 2017 and the lingering effects from the demonetisation policy, the outlook for India remains largely positive, underpinned by robust private consumption and public investment as well as ongoing structural reforms," the United Nations said.

In its report 'World Economic Situation Prospects', released at the UN headquarters in New York, the UN said "GDP growth for India is projected to accelerate from 6.7 per cent in 2017 to 7.2 per cent in 2018 and 7.4 per cent in 2019".

At the same time, the report

declined visibly, and it is expected to narrow further to 3.2 per cent of GDP in 2018, it added.

"Gross fixed capital formation as a share of GDP has declined from about 40 per cent in 2010 to less than 30 per cent in 2017, amid subdued credit growth, low capacity utilisation in some industrial sectors and balance sheet problems in the banking and corporate sectors. In this environment, vigorous public investment in infrastructure has been critical in propping up overall investment growth," it said.

According to the report, there exists some degree of uncertainty over the monetary policy stance in India.

"Subdued inflation, coupled with a good monsoon season, offers scope for additional monetary easing," it said.

Fiscal deficit in India has

declined visibly, and it is expected to narrow further to 3.2 per cent of GDP in 2018, it added.

An upturn in the global economy now growing by about 3 per cent paves the way to reorient policy towards longer-term issues such as addressing climate change, tackling existing inequalities and removing institutional obstacles to development, according to the United Nations World Economic Situation and Prospects (WESP) 2018.

"The World Economic Situation and Prospects 2018 demonstrates that current macroeconomic conditions offer policy-makers greater scope to address some of the deep-rooted issues that continue to hamper progress towards the Sustainable Development Goals," said UN Secretary-General Antonio Guterres in the foreword of the report.

Essar Port to complete 830 crore expansion at Vizag terminal

MUMBAI, DEC. 12-(PTI):

Ahead of the commissioning of a new 8,000-tonne per hour ship loader, the Essar Group run Vizag Port is shutting its operations for seven days. The commissioning of the ship loader is part of the port's Rs 830-crore modernization and expansion project, the port said.

This expansion will upgrade and expand the harbour's iron ore handling capacity from 12.5 million tonne

to 23 mt per annum.

During the shut from December 13 to December 19, other cargo handling equipment, including a new reclaiming and a mechanical conveyor system, will also be commissioned.

The new ship loader can handle 120,000 tonne per day cargo which will translate to shorter turnaround time and competitive freight costs for exporters on the East Coast.

CH Satyanand, the chief

executive of the port said the shutdown is being undertaken without any disruption to exporters' shipments. The port is replacing a 41-year-old ship-loader with a new one.

Essar Vizag Terminals began the expansion project in May 2015 on a design-build-finance-operate-Transfer basis for 30 years. Since then, it has ramped up iron ore loading capacity from 25,000 tonne per day to 70,000.

Raj Thackeray's son engaged to Mumbai-based fashion designer

MUMBAI, DEC. 12—

Maharashtra Navnirman Sena (MNS) chief Raj Thackeray's son Amit, 25, got engaged to fashion designer Mitali Borude in a private ceremony here yesterday.

After the ceremony, Amit posted a picture on his Facebook page with his wife-to-be, with the caption "New boss in the house".

Govt will fully protect public deposits: Jaitley

NEW DELHI, DEC. 12—

Seeking to allay concerns of depositors over provisions of a draft law, Finance Minister Arun Jaitley today said the government will fully protect public deposits in financial institutions even as he hinted at openness to changes in the proposed FRDI Bill.

Jaitley said the government's massive Rs 2.11 lakh crore capital infusion plan in banks was to strengthen banks and there was no question of any lender failing.

If any such situation arises, the government will "fully protect" the deposits made by customers, the finance minister said here adding that "the government is very clear about

it".

Jaitley made the comment to allay concerns with regard to a provision in the Financial Resolution and Deposit Insurance (FRDI) Bill, 2017, first introduced in the Lok Sabha in August this year and currently undergoing scrutiny by a joint parliamentary committee.

The so-called "bail-in" clause in the draft legislation has been commented upon by experts as of bringing potential harm to deposits, in the form of savings accounts.

"The Bill is before the joint committee of Parliament.

Whatever are the recommendations of the committee, the government will

consider," he said.

He said rumours are being spread about the provisions of the bill. "The government has already clarified and said it is committed to strengthen PSU banks and financial institutions. About Rs 2.11 lakh crore is being pumped in to strengthen the public sector banks."

The FRDI Bill proposes to create a framework for overseeing financial institutions such as banks, insurance companies, non-banking financial services (NBFC) companies and stock exchanges in case of insolvency.

The 'Resolution Corporation', proposed in the draft bill, would look after the process and prevent the banks

from going bankrupt. It would do this by "writing down of the liabilities", a phrase some have interpreted as a "bail in".

The draft bill empowers Resolution Corporation to cancel the liability of a failing bank or convert the nature of the liability.

It does not specify deposit insurance amount. At present, all deposits up to Rs 1 lakh are protected under the Deposit Insurance and Credit Guarantee Corporation Act that is sought to be repealed by this bill.

Prices move up

By Cotton Man

MUMBAI, DEC. 12—

The cotton prices continued their upward march at all-India level backed by good demand from user industry.

Made in Green by OEKO-TEX establishes itself in the home textile sector

From Tecoya NewDesk

MUMBAI, DEC. 12—

Safe in terms of human ecology and yet sustainably produced: these criteria are becoming increasingly important to consumers when buying home textiles. With MADE IN GREEN, OEKO-TEX offers a label that transparently communicates these product qualities at a glance. Numerous home textile manufacturers of, amongst others, bed linen and terry articles are already using MADE IN GREEN and customer response is positive.

Customers are particularly demanding if the textile has direct contact with skin. Since 1992, OEKO-TEX has offered textile testing for harmful substances using independent laboratory tests. Yet customer consciousness towards textiles is constantly expanding and nowadays other questions are increasingly influencing purchasing decisions: Was this bedding produced under socially responsible and safe conditions? Were these towels produced by an environmentally friendly company? The MADE IN GREEN label answers all the customer's queries with a clear and simple "yes". It is only issued for textile products that have been tested for harmful substances according to STANDARD 100 by OEKO-TEX and that also originate from sustainable production facilities following the requirements of the STeP by OEKO-TEX certification (STeP stands for "Sustainable Textile Production").

"If customers consider the MADE IN GREEN LABEL, they have the opportunity to make a sustainable purchase decision for themselves, fellow human beings and the environment" explains Georg Dieners, General Secretary of the OEKO-TEX Association.

Although the label was only introduced in 2015, numerous home textiles are now labelled with MADE IN GREEN, the clear commitment to improving product safety and ecological and social

production conditions. This includes mattress toppers and incontinence support, hand towels, bedding and pillows from the companies Amidex, Dibella, Loftex, Setex, and Adam Matheis GmbH und Co. KG with their brand Schlafgut (Sleep Well), just to name a few.

The MADE IN GREEN label offers consumers a level of transparency that was previously unattainable. Each label has a unique product ID or QR code. With this, customers can trace the production of the respective product directly in the shop via their smartphone. A brief scan of the QR code provides answers, among others, to questions such as: In which production facility along the textile chain was this textile produced? In which countries did production take place? This creates trust and offers customers an additional opportunity to inform themselves directly about products and compare them to one another when buying textiles. The MADE IN GREEN label, introduced in spring 2015, is therefore a compelling sales argument, particularly for brands and retailers with an affiliated supply chain that market to health conscious and responsibly minded customers.

To simplify the selection of MADE IN GREEN labelled products for retailers and companies, OEKO-TEX provides the OEKO-TEX Buying Guide free of charge at www.oeko-tex.com/products. The tool provides support with the sourcing of raw materials and products, as well as in the selection of cooperative partners and suppliers along the textile chain. OEKO-TEX thus offers companies and retailers a complete system based on highly coordinated and integrated labels and services. Those wishing to obtain an overview in person can speak directly to the OEKO-TEX experts from several member institutes at the Heimtextil exhibition 2018 in hall 8.0, booth D96.

Imports on upswing

Continued from Page 1 Col 6

India duty free. This is putting Indian garment industry at a major disadvantage and it is feared that this figure will go up further in the coming days as more Indian Brands shift sourcing from India to low cost duty free countries like Bangladesh and Sri Lanka, he pointed out.

Texprocil Awards...

Continued from Page 1 Col 2

US\$ 2.05 billion and cotton made-ups of approx. US\$ 5.3 billion. The Council has targeted US\$14 billion worth of exports for the current financial year i.e. 2017-18.

Under its many ambit of activities, TEXPROCIL promotes exports through buyer seller meets, participation in trade fairs, in depth market studies and by leading delegations to explore potential of global markets. TEXPROCIL also assists the Ministry in formulating policies to promote textile exports. TEXPROCIL's awards are recognized world over by textile importers and hence exporters attach high importance to these awards.

Cotton prices stable: TxC

Continued from Page 1 Col 2

Madhya Pradesh. The reason for lower cotton production in these 2 States is on account of pink boll worm attack, particularly in Yavatmal and Jalgaon districts.

When asked about the cotton price scenario, Dr. Gupta informed that the prices will remain stable during this cotton season. Indian cotton prices will reflect the global price trend which is stable.

There has been high degree of cotton price volatility at the beginning of the season. However, subsequently the cotton price decline and also reached below MSP levels on account of which Cotton Corporation of India has procured 3.5 lakh bales of cotton until now. During the last 8 days prices have increased by 5% in the domestic market, she noted.

Dr. Gupta informed that the CAB is in the process of setting-

up a committee which will develop a methodology on a scientific structure to determine the cotton crop of India. The committee will comprises of 8-10 members, he added.

BSE launches five new mkt cap-based indices

MUMBAI, DEC. 12—

Asia Index, the equal joint venture between BSE and S&P Dow Jones Indices, today launched five size-based indices to measure the performance of the large-cap, mid-cap and small-cap companies.

This would better represent the market capitalisation and help meet the regulatory requirements, according to a statement.

The move is in response to the Securities and Exchange Board of India (SEBI) circular of October 6, which outlined detailed guidelines for the categorisation and rationalisation of mutual fund schemes.

"The new set of size indices are a suitable benchmark for market participants and are in line with the Sebi circular. We will continue to ensure we meet market demands and provide suitable, transparent and rules based benchmarks," said Alka Banerjee, Asia Index chief executive said in a statement.

The new indices comprise stocks from the constituents of the BSE 500 Index and are weighted on the basis of their float-adjusted market capitalisation, she added.

The BSE 150 Midcap Index is designed to measure the performance of 150 mid-cap stocks by total market capitalisation subject to buffers, in the BSE 500 but not in BSE 100.

The BSE 250 Smallcap Index is designed to measure the performance of 250 small-cap companies, by total market capitalisation, in the BSE 500 that are not part of the BSE 100 and BSE 150 MidCap.

The BSE 250 LargeMidcap Index measures the performance of 250 companies on the basis of their mcap in the BSE 100 and BSE 150 mid-caps, while the BSE 400 MidSmallcap Index gauges performance of 400 stocks in the BSE 500 that are not part of the BSE 100 Index.

Finally, the BSE 250 LargeMidcap 65:35 Index is designed to gauge the performance of a composite index comprising BSE 100 and BSE 150 mid-caps. The index consisting of a position with a 65 per cent index weight in the BSE 100 and a 35 per cent weight in the BSE 150 Midcap.

The new indices have a back test first value date starting from Sep 16, 2005 and are calculated in the rupee and the US dollar for both price returns and total returns versions.

While the value of the BSE 250 LargeMidcap Index will be available at the end of the day, the values of the rest of the indices will be on a real-time basis. The indices will be rebalanced semi-annually, in June and December, whereas, the BSE 250 LargeMidcap Index will be rebalanced quarterly.

Asia Index is a 50-50 partnership between S&P Dow Jones Indices and BSE. (PTI)
